TRE RICHMOND CONSOLIDATED.

The Bulletin has the annexed notes of interest concerning the Richmond

Consolidated, at Eureka: It is both a compliment and a criticism that there should be so much foreign capital invested in American mining property. It shows that others have faith in our resources, if we have none, or but little; and it is a standing commentary on the timidity of our capitalists that men should cross two oceans with their money to invest in and work our mines. Out side of the Comstock Lode, some of the best mines on the coast are being worked with the aid of British sovereigns. The Richmond Consolida-ted, in the Eureka District, Nevada, is an instance in point. The affairs of this mine have recently been under investigation by a committee, and the report presented brings out some points of value. The property con-sists of four patented and sixteen unpatented claims, besides twenty seven acres of land, subsequently located, for the site of a new shaft, work on which has already been commenced. The four patented claims are Lookout, Richmond, Tip Top, and St George, representing 8,001% linear feet, by an average width of 254 feet. The non-patented claims measure 18,176 linear feet by a width of 200 feet The Company have also some 3,600 acres of woodland, purchased chiefly from the Government. The property has been worked for about eight years. The original capital was \$1,100,000 in 44,000 shares of the par value of \$25 each. Of this money, \$1,000,000 was paid for the Richmond, 501½ 2 300 feet, Colorado, 1,400x200 feet, to on the with certain reduntion works. gether with certain reduction works. Subsequently the Tip-Top, 600x300 feet, were acquired by purchase. To meet this outlay and to provide for additional furnaces, the capital was increased in 1873 to \$1,350,000 by the addition of 10,000 shares. This is the present capital, divided into 54,000 shares of \$25 each. The stock is held almost exclusively in England, and is quoted at \$60 to \$62 50 per share. Up to August, 1877, a period of six years, the net proceeds from the sales of lead and dore silver produced chiefly from the so called pipe vein in the Richmond mine, amounted to \$7,550,000, in addition to the \$93,000 in ore and bars then on hand From the above \$7,550,000, \$903,000 had been returned to stockholders in the form of dividends. The cost of the mines and other property of 000 for freight and insurance, 182. very soon became not only popular only for interest and \$415,000 added but powerful among that class of to the capital account. The mine is now working 140 men, and the monthly expenses approximate \$125, 000. The first dividend was read to the capitals among that class of laborers who for a long time had felt sore at the capitalst. JUDGE ORD ON REALNEYISM.

A New York Tribune reporter has interviewed Judge Ord of San Francisco, now in New York. The latter Baid:

I have watched the progress of the Kearney movement from its inception. It was brought about through the usual conflict between capital and labor, but principally through the employment of Chinese labor to the credition of all others. the exclusion of all other. The emigration of Chinese at first was very light and their coming was not objected to, and in fact sourcely noticed. It was not until the Central Pacific and Union Pacific Companies extended competitive advantages to Chinese emigrants, and created such a tre-mendous influx for several years to the Psoific Coast that the present dis-turbance began to exist. White men and women who were only receiving moderate compensation for their labor were discharged, and Chinamen who proved themselves to be willing and apt scholars, were substituted in their place. Not only did they make able miners, laborers and mechanics, but cooks, servants and chamber-maids, and to-day a great many of

the very best houses on the Pacific Coast contain Chinese servants of every grade. The enterprising la-borer who had saved a small puttance easily stood this change for a short time, but while he was standing still spectators, manufacturers and others with capital were quickly gaining wealth through the introduction of cheap labor. The result has been that in a few years the workingmen have become beggars and the capital ist has become rich, and to-day San Francisco contains over one hundred millionaires. As a natural consequence this great wealth has created monopoly. This has assumed such a gigantic shape that every kind of legislation, both local and State, is constantly being tampered with, and even our courts are in danger of being controlled by these monopolists. This, with the general depression in business and real estate, placed property owners in very bad odor. As an instance, I recall the case of Hopkins, an extensive stock owner of the Pacific Coast, who contemplated building a very fine mansion just out-side of our city. Drawings were completed and ground broken. The side of our chy. Drawings were completed and ground broken. The cost was estimated at \$1,000,000. Hopkins employed Chinese laborers and the work was advancing rapidly. and the work was advancing rapidly. But while this was going on white laborers grumbled considerably, and one night a large gang of these men proceeded to the unfinished house and destroyed it. This was the signal for a general outbreak, since which time confusion and disorder. which time confusion and disorder have been rampant under the leadership of Kearney. Hopkins was forced to leave the city and settled in the southern part of the State where he died in a few months, his nerves having become fatally affected. No will was found after his death, but an estimate of his wealth can be formed from the fact that his wife was compelled to furnish a per sonal bond of \$10,000,000 as adminis-

tratr x of the estate.

All parties must have a leader, and Korney became a favorite among the rabble and was looked upon as their leader. Seeing this he conceived that his only opponents were the great capitalists, whom he despises in their alleged inability to of the mines and other property of the Company to August, 1877, had been \$1,800,000, including \$170,000 for expenses of law suits with the Eureka Consolidated Mining Company. Encouraging News.

more of a success than either, of its predecessors. Mr. Chamberlain, who has just returned from below, reports all sides. He took pains to personally interview all the prominent horse sured him they would visit and help out the Reno Fair. Mr. Chamberlain finds that our programme needs modification and alterestion in two or three places, probably the 8-yearother respects our programme gives complete satisfaction, and the best horses on the coast will be here to contest for the purses.

Coing Bast. W. J Marsh was to have left last Pennsylvania. He goes for the purpose of attending his parents' golden wedding, which takes place on the 6th of August next. Mr. Marsh has not been home for twenty-nine years, and very naturally desires to see his parents while they are both slive. It is probable that the remaining seven children will also be there on that occasion. Death has not visited the family, so there will be no vacant chair at that gathering. Should they all gather around the family board again it will be the first time for thirty years. No doubt the reunion will be a very pleasant one.

all gone from the Sierras. Even Indians tried to scalp him, but as he vicinity is almost bare. This state alone. of affairs is due to the cutting away of the timber. The Truckes river is already very low, but will no doubt be lower before long. In fact it will the most. soon contain but the natural outflow of Lake Tahoe. Then when we consider that the large number of ditches take a greater portion of it out, the remainder is a very small quantity. We fear that drouth will be apt to follow the loss of timber in the mountains.

Snow all Gone.

A Mistake.

If Carson persists in holding her Fallfraces the week before the State Fair at Reno, she will discover that a great mistake was made in choosing that time, as the California horses will not go there first, but be put in training on the Reno course for the State Fair purses But if Carson will have her races commence on the Tuesday following Fair week, a good attendance will be secured, for a two days' rest will be given the horses. It is not too late to make this change, and we suggest to our Carson folks the advisability of doing it.

Citizens' Meeting. A meeting of the citizens is called for Monday night at Smith's Academy of Music. The meeting is called for the purpose of discussing State Fair matters, with a view to do something to make it attractive. Sacramento, at a citizen's meeting, raised \$3,000 to be offered as special premiums, etc., and Reno can and ought to be liberal in the same way. Every citizen who loves his town should be present at the meeting next Monday evening. Reno expects every man to do his duty.

Manufactory.

A gentleman from the East was here vesterday and partially made arrangements with M C.
